

Team Contract

It is acceptable for some people to do more work than others, given that everyone does C-level work at minimum.

Our team will use our in-class time to catch each other up on the status of our project, check in with the TA, then go get food and write/review code.

We will meet on the early evening of the 23rd, then continue discussions online over the break. When classes resume, we will meet on Tuesdays and Thursdays at 4:30 in addition to class time.

Work will be divided such that there is someone available to review all code written. Tests and implementation may be executed by different people for any task. We will keep track of who is responsible for which task on a shared Google doc.

Specs require a 2/3 majority, and implementation will be code-reviewed but is up to the implementor.
